Corsets

For many months past our buyers in the East have been closely watching the CORSET TRADE, with a view to furnishing our patrons with the best values the market affords. Visiting one manufactory after another, inquiring into and carefully comparing Crane's Fine Note Paper and Envelopes; the merits of the articles produced, so patient and painstaking has Illuminated Papeteries (Paper or Cards); been their research that not until quite recently did they arrive at any conclusion, and now, as the fruits of their labor, we have received direct from the manufacturers.

What Eminent Chicago Physicians say of it.

CHICAGO, October 23, 1880.

I have examined BALL'S HEALTH PRESERV-ING CORSET and believe that it is in every respect best calculated to preserve the health of the women who wear it.

It does not seem to be possible for the wearer of such a corset to be injured by tight lacing. It should receive the favorable endorsement of the Physicians who have the opportunity of examining it. JAMES NEVENS HYDE.

CHICAGO, October 13, 1880.

I have examined BALL'S HEALTH PRE-SERVING CORSET, and believe it to be the least injurious to the wearer of any Corset I have seen.

A. J. BAXTER, M. D. CHICAGO, October 27, 1880.

I do not advise any woman to wear a Corset, but if she will do so—and she generally will—I advise her to use one of BALL'S HEALTH PRESERVING CORSETS, as it is less likely to do her injury than any with which I am acquainted.

A. REEVES JACKSON.

HEALTH PRESERVING

This CORSET comes to us with the indorsement of four eminent Eastern Physicians, each testifying in unmistakable terms as to its health-preserving qualities. The rapidity with which this CORSET has become popular in the East, is owing not only to the novelty of its construction, the additional comfort that it brings to the wearer, but also to its durability and intrinsic worth. What the manufacturers

"Two-thirds of the weaknesses and ills of female life are directly attributable to the unyielding pressure of the Corset. This evil has been entirely overcome in this Corset by the introduction of ELASTIC SECTIONS composed of a series of fine Coiled Wire Springs. The Supreme Court is about the last place in all Washington where anyone would think of looking for oddities or venerable belongings, and while to the casual eye its principal property lies in the solemn and grandmotherly impressiveness of a full and black-gowned bench, the nooks and corners of its chambers and small offices are filled with traps and fragments that tell of other days, when dignity was less thickly laid over its front and the simplicity of an early time and a

The holes and cracks are then filled with paper putty, made by soaking newspapers in a paste made of wheat flour, water and ground alum, as follows: To one pound of flour add three quarts of water and a tablespoonful of ground alum, and mix thoroughly. The floor is then coated with this paste, and then a thickness of manila or hardware paper is put on. If two layers are desired, a second covering of paste is put on the first layer of manila paper, and then the second thickness of manila paper is put on. This is allowed to dry thor-oughly. Shall we, then, judge a country by the majority or by the minority? By the minority, surely. 'Tis pedantry to estimate nations by the census or by square miles of land, or other than by their importance to the mind of the time. Masses ! the calamity is the masses. I do not wish any mass at all, but honest men only lovely, sweet, accomplished women only, and no shovel-handed, narrow-brained, gin-drinking, million stockingers or lazzaroni at all. This is a concession on years, admits that when it wrote it it busily engaged in clearing the line, plantknew it was 40 per cent. in access of the ing the telegraph poles and stretching the

He has been plausibility, yet the fact is now patent that the proposition of the railroad company to pay 60 per cent. of the tax was a fair one, and ought to be accepted. By the decisions of the Superner Court of the United States it is probable that this discrimination invalidates the whole tax; but whether that be so or not, it is certain that, upon the testimony which the Boarditself will be bound to give in these cases, no more than 60 per cent. can ever be recovered in them.
